Enabling Providers to Successfully Meet MU Regulatory Compliance Requirements

The Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs, commonly known as Meaningful Use (MU), reward providers for delivering high-quality care — shifting American healthcare away from fee-for-service and towards pay-for-performance models to improve care and manage costs. The programs aim to improve clinical documentation and preventive care for better patient outcomes, improved population health and lower costs for all in the United States.

G Meaningful Use Program - New Provider Reporting Requirements

The MU programs also required CMS to create a set of Clinical Quality Measures (CQMs). CQMs measure many patient care aspects including health outcomes, clinical processes, patient safety, patient engagement and care coordination.

The MU CQM reporting requirements have added to an already complex regulatory environment for providers. Some of their challenges are:

- There are different approaches for managing MU with each EHR vendor. Often, a single system will have multiple EHRs and it is difficult to validate the data.
- The available reports often do not include sufficient data to efficiently monitor performance.
- Most EHR systems are inefficient in producing near-real-time exception reporting to prompt health care provider action to complete required steps.
- The MU Clinical Quality Measures (CQM) can be complex and require detailed knowledge of EHR data system infrastructure.

G MUReportsGenie – Beyond CQM Reporting for MU Compliance Explore Data. Interpret Results. Impact Performance

Anthelio's MUReportsGenie helps providers manage the Meaningful Use program Stage 1 & Stage 2 measurements, by providing high level compliance rates accompanied by detailed drill down reporting.

MUReportsGenie goes beyond accurate data reporting and meeting regulatory Meaningful Use quality reporting objectives. Through Anthelio's expertise in healthcare data analytics, we help hospitals understand the data elements, interpret the results, and identify ways to impact performance and outcomes.

MU Reporting Tools – Features and Capabilities

- Near-real-time exception reporting
- Audit and monitor patients during the entire stay to proactively identify opportunities for compliance
- Alerts and notifications when at risk of not meeting MU measures
- Provide customized analysis for population excluded from the MU program
- Generate summary view with dashboard and drill down ability to identify specific areas of non-compliance for root cause analysis
- Customized reports for stakeholders including Nurse Managers with ability to generate ad-hoc reports in an easy manner
- Report generation and batch delivery to patient care units for rapid response and timely intervention to support quality of care
- Vendor-agnostic solution - Integration with multiple EHRs to produce one source of truth for MU measures
- Cloud Hosting with web accessibility
- MUReportsGenie is mobile enabled

Anthelio – Your Partner for MU Compliance and Improved Performance

The market place requires a flexible, web-based application that overlays on any of the major EHRs to support performance improvement, data validation and management analytics to support client objectives.

Anthelio's MUReportsGenie is an adaptable easy-to-implement solution that can meet the specific needs of a customer while using industry best practices. Apart from supporting regulatory compliance, it provides detailed reports to guide providers in root cause analysis for improved outcomes.

Empower Your Organization To Meet The MU Reporting Challenge.

About Anthelio

Anthelio Healthcare Solutions is a driving force in the healthcare industry and is the largest independent provider of healthcare technology solutions to hospitals, physician practice groups and other healthcare providers. By provisioning hospitals in over 450 counties across the US with innovative solutions in the areas of IT, EHR, HIM, Patient Engagement, Enterprise Interoperability (EI) and Healthcare Analytics & Informatics (HAI) services, Anthelio impacts quality care to over six million patients. Anthelio is the only healthcare services company with “end-to-end” services expertise, including admission/registration, IT, medical records, EMR implementations, clinical transformation, coding, ICD-10, transcription, and revenue cycle services. Powered by cutting-edge technologies and thousands of healthcare professionals with extensive clinical and operational experience, Anthelio drives high value for over 20,000 physicians and nurses in hundreds of healthcare organizations supporting their annual revenue of over \$12 billion.
