DALLAS, TX, November 17, 2011 – Anthelio, the leading independent provider of comprehensive healthcare information technology services and business process solutions for hospitals and other healthcare providers, today announced the launch of Healthcare Innovations Hub, www.healthinnovatehub.com, a collaborative public healthcare wiki aimed at generating public dialogue and identifying new innovative ideas to improve healthcare quality, patient safety and costs.

The wiki will use sophisticated ideation software to harness innovative ideas from Anthelio's customer base of more than 100 hospitals and healthcare providers, as well as Anthelio's employees, industry experts and the public at large. The wiki was created with guidance and input from Anthelio's [Healthcare Innovation Council](#), an independent group of leading healthcare experts, who will select the most innovative ideas generated by the wiki to implement in pilot projects throughout the U.S. The results of these pilot projects will be shared publicly for the benefit of the industry.

The website is designed to use advanced crowd-sourcing techniques to collect ideas on a broad range of healthcare subjects, and ideas will be ranked and rated by people using the site. Over time, the site will become a dynamic resource to facilitate active discussion and debate around the most pressing healthcare industry issues, and will help hospitals meet key challenges such as improving the delivery of high quality, safe, effective, patient-centered, healthcare services, as well as top-line and bottom-line financial results.

"This new wiki illustrates our overarching goal to create a higher standard in healthcare by exploring new innovative ideas and re-thinking the fundamental economics of the healthcare system," said Rick Kneipper, Chief Strategy and Innovation Officer of Anthelio and Chairman of Anthelio's Healthcare Innovation Council. "This will be a revolutionary resource for the healthcare industry because all of the information gathered through the wiki will be shared publicly for open review and discussion, along with the details of pilot projects Anthelio will implement as a result of the ideas collected. This level of transparency and open discussion is a first for the healthcare industry, and we believe will make a significant impact in meeting so many of today's challenges. Our wiki will enlist the creativity and passion of the thousands of dedicated people in the trenches of care delivery to provide practical ideas about how to improve our care delivery system."

Jonathan Lord, MD, Chief Innovation Officer and Professor of Pathology at University of Miami, and a member of Anthelio's Healthcare Innovation Council, said, "The healthcare industry faces a number of challenges that threaten the quality of patient care on a broad basis, and we need to explore new innovative ideas to meet these challenges. For example, in the current healthcare system, doctors and clinicians are spread too thin, and they are compensated based on the quantity of patients they treat, rather than the quality of the care they provide. We need to find new ways to allow medical professionals to re-focus on patient care, which means equipping them when the technology

and tools they need to work more efficiently, and give them the most relevant patient data and analytics to make the best medical decisions for their patients.”

About Anthelio

Anthelio is the largest independent provider of information technology and business process services to hospitals, physician practice groups and other healthcare providers. By provisioning hospitals with comprehensive, high-quality, flexible and secure IT and BP services, Anthelio improves hospitals' healthcare services while reducing costs and streamlining processes. It leverages knowledge and expertise built over a decade of operations about clinical and administrative IT processes and best practices to provide improved IT and BP services at lower costs to customers. Anthelio is headquartered in Dallas, Texas. For additional information, visit the company's website at <http://www.antheliohealth.com/>.
