Anthelio Healthcare Solutions announce new Health Analytics and Informatics (HAI) Division

Dallas, Texas, February 26, 2014 — Anthelio Healthcare Solutions, the largest independent provider of technology and services to hospitals, physicians practice groups and other healthcare providers launched a new division within the company – Health Analytics and Informatics (HAI) Division. By its acquisition of all the analytics tools, applications and underlying technology of HealthMatrix IT, LLC (HMIT), Anthelio is uniquely situated to offer solutions for the clinical, financial and operational data needs of the healthcare industry. Former HMIT President and owner Midori Kondo will lead Anthelio’s HAI Division as its Vice President of Analytics. Since its founding, HMIT has provided strategic consultant solutions to industry leading health systems advising organizations on clinical, operational and information technology projects, including data governance and guidance into the extraction and reporting of data translated into meaningful information.

Providers are continuously re-evaluating their strategic IT investments with the goal of increasing efficiency, reducing costs and improving outcomes through health analytics. In response, Anthelio’s new HAI Division will focus on driving business intelligence through data mining in order to ensure quality care solutions increase the accuracy in billing and collections and support emerging health issues.

“In combination with our proprietary data warehouse solution Patient Information Exchange, Anthelio delivers a comprehensive offering making patient information actionable, which is not provided by EHRs in the market. The combined power of these solutions supports Anthelio’s vision of being the valued partner to better patient care, improved health and lower costs for providers, patients, hospitals and payors,” said Asif Ahmad, CEO Anthelio Healthcare Solutions.

Anthelio’s offerings include financial tools for ICD-10 as well as reimbursement applications; clinical performance tools for Meaningful Use and Payor Quality Program reporting. Additionally, Anthelio provides operational performance tools to maximize hospital workflow efficiencies.

“Combining our platform and healthcare solutions with Anthelio’s offerings promotes a synergic relationship in an innovative environment. I am excited to join the Anthelio team and look forward to

providing solutions that will be focused on predictive and prescriptive analytics, which will clearly set Anthelio apart in the healthcare market,” said Midori Kondo.

Our ability to gather and store electronic health information has outpaced our ability to analyze and use that information. Data is an enterprise asset. Strategic mining of data will prove essential to investments when leveraging financial, patient and operational performance. “Through the purchase of market-leading analytic products in combination with the data warehousing and industry leading technology solutions of Anthelio; we plan to provide comprehensive analytic solutions to hospitals and healthcare providers. I am confident that our new HAI Division under the leadership of Midori Kondo will be critical to addressing these concerns for our healthcare partners across the country,” said Asif Ahmad.

About Anthelio

Anthelio is the largest independent provider of technology and services to hospitals, physician practice groups and other healthcare providers.
