

**Anthelio Healthcare Solutions' Engage Mobile Application Earns
ONC-HIT Certification from Drummond Group LLC**
*Certification enhances Anthelio's single source solution for Meaningful Use
and 360 degree approach to patient engagement*

Dallas, Texas, 3rd June 2015 —Anthelio Healthcare Solutions, the largest independent provider of healthcare technology and services, today announced its innovative patient engagement mobile application, Engage, has achieved Office of the National Coordinator for Health Information Technology (ONC-HIT) 2014 Edition Modular Certification via Drummond Group LLC, an Authorized Certification Body (ACB) that has been empowered to test software for compliance with the requirements of the federal government's program. The stamp of approval designates that the software offers the functionality that enables eligible providers and hospitals to meet Stage 1 and Stage 2 Meaningful Use (MU) requirements, qualifying these organizations to receive payments under the ongoing EHR adoption program.

"We are excited to have another Anthelio patient engagement solution achieve MU certification, strengthening our profile as a single source solution for MU certification and 360 degree patient care," said Asif Ahmad, CEO, Anthelio Healthcare Solutions. "Engage mobile application gives healthcare providers a flexible, cost-effective tool to educate and empower patient communities, improving treatment adherence and outcomes while efficiently meeting increasingly demanding MU requirements."

To earn the certification, Engage was tested to be in accordance with applicable standards and certification criteria put forth by the Department of Health and Human Services. With the certification, Engage now has 2014 Edition EHR Module (Ambulatory) Certification for the following features: Secure Messaging, Automated Numerator Recording, Automated Measure Calculation, and Quality Management System.

Engage is an on-the-go patient engagement application and a point-of-service interactive experience for patients, health plan members, and caregivers. It provides a flexible framework for multiple, customizable points of access to applications and information while delivering high value to patients. Patients have quick and easy access to personal health records and other useful information on demand from anywhere, anytime. Patients can manage their own care by updating personal information, booking appointments, viewing lab results, requesting prescription refills, accessing educational material, and securely communicating with their care team whenever they want. Engage is customized to provide a personally branded application, making it a valuable tool for providers to build brand awareness and loyalty.

Engage is the latest addition to Anthelio's industry-leading patient engagement products and services that help providers efficiently communicate with their key audiences while fulfilling Meaningful Use requirements. The company's state-of-the-art solutions are designed to deliver sustainable value by providing quick and easy implementation and access, efficient real-time data mining, cost containment, and a wealth of opportunities for patient involvement, making them the smart choice for providers seeking high value engagement strategies.

Engage ONC Certification Details:

This EHR Module is 2014 Edition compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of the U.S. Department of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.
