Anthelio's Patient PULSE Receives Meaningful Use Certification

Dallas, Texas, November 11, 2013 — Anthelio Healthcare Solutions, the largest independent provider of technology and services to hospitals, physician practice groups and other healthcare providers today announced that its patient engagement platform, Patient PULSE has been certified to meet Meaningful Use requirements by the Certification Commission for Health Information Technology (CCHIT[®]), an Authorized Certification Body (ACB) designated by the Office of the National Coordinator for Health Information Technology (ONC).

“As Meaningful Use evolves and self-care increases for consumers, focus will shift to engaging patients in a coordinated way that leads to better health outcomes,” said Asif Ahmad, CEO, Anthelio Healthcare Solutions, Inc. “Our Patient PULSE is a high performing technology tool that’s designed to impact millions of patients which will ultimately help improve patient engagement, treatment adherence and outcomes.”

Anthelio’s Patient PULSE is a dynamic, consumer engagement software platform developed and designed to educate, empower and provide ready access to patients about their personal health. With the goal of enhancing interactions between patients and care providers, this secure and scalable platform presents a 360-degree approach with unprecedented ease of use and access to medical records and personal health information while at home, on the go, and at the point of care.

Patient PULSE provides seamless integration with backend systems to produce a single version of the patient’s information across the continuum of care. This innovative technology has incorporated the U.S Government’s Blue Button Technology, allowing patients to access and download their health information in a simple readable format. Its patient friendly user interface and flexible patient/provider communication platform personalize the patient portal experience, and tailor services to patient needs.

“I am pleased that our highly skilled team listened to the concerns of healthcare providers in attesting for Meaningful Use, and developed Patient PULSE with clinician requirements in mind,” said Asif Ahmad, CEO, Anthelio Healthcare Solutions, Inc. “Anthelio’s Patient PULSE allows providers to manage mass communications with their patients and drive increased patient enrollment far exceeding the current Meaningful Use enrollment requirements.”

About Anthelio

Anthelio is the largest independent provider of technology and services to hospitals, physician practice groups and other healthcare providers.
