The world is my waiting room

Engage is

A solution to the problem: In an era where everything seems to be on-demand, does your healthcare organization have an on-demand mobile solution? Healthcare providers are searching for a way to stand out in the crowded space and Engage gives your organization a distinct advantage.

Engage is a mobile application and a Point of Service interactive experience for patients, members and designated caregivers. This revolutionary app serves as the delivery mechanism for an effective engagement strategy, leading to improved health education, consistent communications among provider and patient populations, and increased brand loyalty, brought to you by Anthelio.

Connecting with...

Patients, members and designated caregivers on-demand has never been so easy for healthcare providers. Engage delivers a way to connect with this valued population and allows you to promote your organization's brand at the most personal touch point – directly to their mobile device!

Empower your patient population to:

- Interact and engage in healthy program promotions and campaigns
- Access on demand health information
- Communicate directly with their designated care team member or care coordinator
- Request appointments
- Access and update forms prior to arrival

All of which lead to saving time, improving the quality of care and increasing the healthcare consumer's experience!
